Keep it secret

Keep it secret

⚠️ ⚠️ ¡ There are no secrets ! ⚠️ ⚠️

- … If the whole app is in the browser…
then users can inspect **everything** within the app

Keep it ~~secret~~

Known limitations

- Can not use the `{curl}` package
  (or any package with a strong dependency on `{curl}`)

- Not all system dependencies are currently working
  within webR. (Room for future improvement!)

- External database connections do not work

- Again... No secrets!!
